To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Koda et al.

Regarding claim 1, Koda et al. disclose in "Ozone detector" a semiconductor sensor that changes resistance in response to ozone and a pulsed operation of the sensor increasing the sensor operating temperature to a first temperature (400-800°C) and then decreasing the operating temperature to a second temperature (200-500°C) (Pages 1-6).

Regarding claim 3, Koda et al. disclose where the sensor resistance is analyzed as a function of time (Figures 1 and 5).
